Authorisation to use and apply:

CHEASE

at the _____ (insert association name)

The CHEASE code is developed at the Swiss Plasma Center, Ecole Polytechnique Fédérale de Lausanne (SPC/EPFL), Switzerland. CHEASE is an accurate fixed boundary equilibrium solver, flexible and designed to produce interface with many different codes.

The undersigned has received a copy of CHEASE, including its source code, under the additional conditions that:

- 1.- The code does not change its name even if modified.
- 2.- The undersigned agrees with the contributor license agreement (CLA), see [CLA_individual_CHEASE.md](#)/[CLA_organization_CHEASE.md](#) (v2.2) for details, also in the git repository license subfolder. Modifications of the codes that are developed and made available to the SPC are granting the right to EPFL to make these modifications available on an “as is” basis to all other holders of an agreed usage of CHEASE.
- 3.- Results produced with the original or the modified versions of CHEASE should appropriately reference the original publications:
H. Lütjens, A. Bondeson, O. Sauter, *Comput. Phys. Commun.* **97** (1996) 219
- 4.- CHEASE can be used by the partners of the above association on the association related clusters under the above conditions. The partners can obtain the sources to be installed at their home institutes by just signing the code transfer document (<http://spc.epfl.ch/CHEASE>).
- 5.- CHEASE nor their progeny may be transferred or made available to other research groups without the written authorisation from the SPC.
