Authorisation to use and apply

INTERPOS

at the _____ (insert association name)

The open source type interpolation routines INTERPOS are developed at the Swiss Plasma Center, Ecole Polytechnique Fédérale de Lausanne (SPC/EPFL), Switzerland.

INTERPOS is a versatile set of interpolation routines including cubic splines with tension, for which different boundary conditions and error bars can be specified.

The undersigned has received a copy of INTERPOS under the conditions that:

- 1.- The code does not change its name even if modified.
- 2.- Modifications of the code that are developed are made available to the SPC.
- 3.- Results produced with the original or the modified versions of INTERPOS should appropriately reference the original publications:

O. Sauter, SPC-EPFL, private communication (*a publication is under development*)
- 4.- INTERPOS nor their progeny may be transferred or made available to other research groups without the written authorisation from the SPC.
